

Hi!

My name is Pontus, and I hereby submit this application as a male representative for the students in our Faculty Board here at the Business School of NMBU.

From previous relevant experiences, I have had the pleasure of sitting on this specific board as a male representative for three consecutive terms now. This has so far made it possible for me to bring out students' interests in the Business School's operations and strategic plan. Examples of cases completed are the new master's line Bioeconomics and the choice of the continuation of the master's line Business Analytics, where I was involved in strategic decisions for the lines. There are also several minor cases that have emerged through the time I have been involved that have been completed.

As a person, I am goal-oriented, dedicated and solution-oriented. I am also humbled by the opportunity and existence I have had here at NMBU under the faculty of the School of Business. My impression of the students who go here is that there are very nice, up-and-coming and good people around here on campus. That we as students should have a good school to go to now is one of my heart's desires here at NMBU. But also that we as students should get good recognition in the form of the school we come from later in the race when we apply for a job is a matter of the heart for me.

My motivation for applying again is to get the students' voice clearly on the table. This is a position with unique opportunities for influence in what happens in the future here at HH. The importance of the person sitting there thinking holistically about how the students' position will be in the end is central. And I hope you will give me the trust to continue as I think we want the same.
